Wanted in: Philadelphia, Pittsburgh, Baltimore

A stocking distributor for instrumentation accessories. Must be active member of ISA, or willing to be. We offer a patented product with universal acceptance, sales appeal and a field-proven reputation for top quality developed over 10 years. Must be ambitious and enthusiastic in the field of instrumentation. Small and large unit sales will provide high return on investment. Write Box 2507 c/o Instrumentation Technology.

SALES PROMOTION

Fluid Measurement and Control Equipment

Expanding sales and markets create position with established (23 years) company marketing through U.S. and foreign technical sales representatives. Good future for a solid sales producer. Chicagoland location but some travel required.

Please outline your work and financial history and your future goals in your letter. Your confidence will have our utmost respect.

Write Box 2503
c/o Instrumentation Technology

STAFF INSTRUMENT ENGINEER
BS Engineering and a min. of 3 yrs. design and construction of plant process control systems. Some computer interface exp. would be helpful. Will be assigned as Inst. Engr. on large projects ($100MM+) with responsibility for design, contractor selection, vendor liaison etc. To $19,200/yr. base.

AREA MAINTENANCE ENGINEER
Instrument and Electrical Engineer with BS Engr. plus a min. 5 yrs. maint. experience in oil production/refining, or chemical plant. Will be assigned area responsibility for all I and E Maintenance and construction. To $19,200/yr. base.

The above openings are for a large U.S. owned international oil corporation for long-term overseas assignment. They have multimillion dollar expansion program currently being initiated and seek stable, highly qualified and promotable individuals. They offer the chance to work on giant projects, higher levels of job function than available in the USA, unique compensation allowing ability to save most of annual base salary, 4-5 week annual vacation with worldwide travel benefits, family-oriented "Americanized" living conditions with medical, schools, beaches, yachting, tennis, golf, etc. facilities free of charge.

FEES PAID
Our firm is a recognized leader in the placement of graduate engineers in the process industry. Our principal clients include leading oil and chemical companies, process industry suppliers, consulting engineering firms, power and construction companies located in the U.S. and abroad. These companies assume our placement fee. To consider our current or future openings, write to us describing your professional experience and career objectives, or write for our free RESUME GUIDE for engineers. Ronnie Boyd BSME; Bill Prim, BSME.

CONTROL-INSTRUMENTATION

ELECTRO-MECHANICAL ENGINEER

Desired—person with established learning and doing skills (at least 5 years practice) with interest and experience in

- electro-hydraulic servo systems
- electro-mechanical servo systems
- use of computer technology in control systems and data acquisition
- development of system concepts, simulation, and coordination with related engineering disciplines
- preparation of complete system diagrams, schematics, drawings and specifications.

To complement two-man department in small engineering company, directing work of technicians and draftsmen, as required, working with present instrumentation and control engineers and interfacing with civil, structural, mechanical, and aeronautical engineers on one-of-a-kind design projects.

Don Perusse

FLUIDYNE ENGINEERING CORPORATION

5900 Olson Memorial Highway
Minneapolis, Minnesota 55422

An Affirmative Action
Equal Opportunity Employer M/F

INSTRUMENTATION ENGINEER

—PROCESS

Goodyear Atomic Corporation has an opportunity for an engineer experienced in the field of process instrumentation. The work will involve instrument application, designing control systems, writing specifications and requisitions for all types of instrumentation, and cost estimating of control systems.

Requirements
BSME, BSEE, or BSChE—Minimum of five years' experience in process instrument control systems related to the chemical, petro-chemical or petroleum industries. Must have experience in pneumatic and electronic instrumentation. Process computer experience desired but not necessarily required.

U. S. Citizenship Required.
Eligible for AEC "Q" clearance.
Call or write
Employment Department.

Goodyear Atomic Corporation
P. O. Box 628
Piketon, Ohio 45661
